

Meeting Minutes-Group 1 2022-5-4

Attendees: Jennie Q. Colabella, Nick Finelli, Antonio Finelli, Jorge Cruz, Asfand Alavi, Tai Tawil

Discussion:

Timeline until final:

- Presentation: Thursday, May 5, 2022, 6:00-7:00pm
- Video presentation required for the final presentation must be at least 10 minutes. This means each person has a MINIMUM of 2 minutes. We should probably keep them to 4 minutes or under.
- REMINDERS-To do BEFORE 6pm tomorrow:
 - Upload video segments individually to vids folder on Github.
 - Upload all documentation to the appropriate Github folder (flowcharts, etc.)
 - Submit **Final Presentation Milestones** Form (This can be done after the meeting)
-  [grade_submission_form.txt](#) (126 B)

Updates

We reviewed the tasks on the Gantt chart to see which tasks are still outstanding and created a tentative order for the presentation.

Presentation Order:

Landing page/log in (Tai)
API registration (Asfand)
Inventory/home page/forms (Antonio)
Shopping cart (Jorge)
event order (Tai)
API Payment UI (Jorge)
Invoice (Asfand)
Scheduling/Calendar (Tai)
Financial reports (Jennie)
Finance control panel (Asfand)
ADA compliance (Antonio)
Scheduling permissions, error handling, log out (Nick)

Status of final tasks:

Jorge: Connecting event order to payment page. Code is uploaded. Had a couple of errors in the payment page but they appear to be sorted. Asfand will help check since they've been working on it together.

Asfand: Most of his code is uploaded. He's finishing the refund page and API credential editing page. Will check payment page to verify the errors have all been cleared up. Will connect the cart to the event order, then invoice, then API/payment.

Nick: Working on error handling and user permissions as code is uploaded. He and Antonio are managing Github and will get the project stitched together.

Antonio: Code is totally uploaded. ADA and forms are done for most pages. He'll continue to make sure pages meet ADA compliance as code is uploaded. Skip navigation is finished.

Taimur: Uploaded the event order. Calendar is completed, but he has to connect it to API page. Will check with Nick and Antonio re: sessions

Jennie: Finance page code is uploaded. Continuing to make changes to database as needed. Finishing final presentation paperwork. Will create presentation video.

What has to be incorporated into main?

- Landing page
- event order
- calendar
- moneyPage.css, moneyPage.php, hvav_db_v12
- error handling and permissions
