

Meeting Minutes-Group 1
2022-3-17

Attendees: Antonio Finelli, Jorge Cruz, Christopher Moschetti, Nick Finelli, Jennie Q. Colabella, Asfand Alavi

Discussion:

Note: We met for an hour, but I paused the recording while people joined and didn't restart it until halfway through. The written notes cover the entire meeting.

Midterm Presentation Review: Professor Denizard didn't have time to review our paperwork during the midterm presentation, so if he attends our meeting on Monday be prepared to discuss flowcharts, the project proposal, the Gantt chart, etc.

Gantt chart:

- Update what you've completed on the chart. List what you're working on next.
 - Tai is working on the event order and will attach his calendar to it.
 - Chris is working on sessions and classes.
 - Antonio working on database access.
 - Nick finished the error handling and is going to pick a new task from the Gantt chart.
 - Jennie is working on the database tables for scheduling and the z-report.
 - Jorge is going to finalize the shopping cart system. We decided to change the format so it's similar to the inventory page, but isn't the same. There are things on the inventory page that aren't needed on the shopping cart, so Jorge is going to get rid of those items.
 - Asfand is working on the z-report. He's going to look up what belongs on a z-report, make sure we're in compliance with the financial regulatory standards, and will create the UI for the z-report.
- (Jennie) I added the requirements for the project to our Gantt chart and reorganized what was there to fit into Professor Denizard's requirement list.
 - Reviewed the required items with the group so they know what we need for the final project: ADA compliance, mock code for credit card and check handling, security, etc.
- Database: If anybody has tables/fields they need in the database, please let Jennie know.
