

Meeting Minutes-Group 1Z

2022-3-7

Attendees: Antonio Finelli, Christopher Moschetti, Jorge Cruz, Nick Finelli, Taimur Tawil, Asfand Alavi, Jennie Q. Colabella

Discussion:

Midterm Presentation Discussion

- Program Status updates:
 - Login page: Nick, Chris, Jorge
 - Error handling: Nick
 - Home page/Inventory page: Antonio
 - Search for products
 - Create new product, add, delete
 - Shopping cart: Jorge
 - Create invoice: Asfand
 - Sessions: Chris
 - Database: Jennie
 - Calendar: Tai
 - It's a schedule for employees for setup dates. Managers can create events.
 - Logout page: Tai
- Discussion about documentation required for the midterm presentation: The following have to be uploaded to Github. Everyone was reminded to upload them to Github and BB as they finish.
 - Flowcharts
 - Use case diagrams
 - Class diagrams (Chris)
 - Github Discussion
- Everyone should create separate test branches and push their latest files there. If we push our changes to Github starting tonight, and Tuesday night (or early Wednesday morning at the earliest) Chris can combine them on Wednesday.

Organizing Github files

- After the midterm presentation we should reorganize the files on Github to make sure they reflect the items our project needs going forward.

Home page/cart page discussion

- How to make the home page and cart page responsive

Jorge needs help with the cart. Asfand is going to do a breakout session with him after our main meeting to help him. Everyone else is going to work on their part of the midterm presentation.
