Meeting Minutes-Group 1
2022-4-14

Attendees: Taimur Tawil, Jennie Q. Colabella, Nick Finelli, Antonio Finelli, Jorge Cruz, Asfand Alavi

Discussion:

Timeline until final:
- Presentation: Thursday, May 5, 2022, 6:00-7:00pm
- We need the last week of April to put the finishing touches on the presentation.
- Paperwork needs to be submitted before the presentation.
- Video presentation required for the final presentation must be at least 10 minutes.

Updates
Jorge: PCI compliance-a company checks your program. PCI is Payment Card Industry Data Security Standard (PCIDSS) credit card compliance standards. Jorge will ask Professor Denizard what standards he wants us to meet. Jorge has the styling almost done.

Asfand: Professor Denizard doesn't want the key and ID in the code itself, so he and Jorge are working on it. He might encrypt them and then put them in or have them enter it twice. He's going to meet with Professor Denizard to sort that out. He'll work on mobile responsiveness with Tai and Antonio.

Nick: An iframe (HTML) will let you embed one page into another page instead of stitching the program together. Error handling is an ongoing task.

Antonio: Working on ADA compliance. He can use iframe to help with that. Will be finishing the forms. Working on forms for vendors, clients, employees, and venues. He'll work on mobile responsiveness next.

Tai: Plans to push to Github later this week. The event order form is done. He's planning to pull from the database to the calendar this weekend, then he's going to work on the mobile responsiveness and the landing page.

Jennie: Working on Z-report, planning our final presentation.
